

Dépôt serveur
(GitHub)

Répertoire de
travail

Zone de
transit

Répertoire
local (.git)

add

```
graph LR; A[Répertoire de travail] -- add --> B[Zone de transit]; B --- C[Répertoire local .git]; D[Dépôt serveur GitHub];
```

The diagram illustrates the initial step of the Git workflow. A large rectangular box contains three components: the 'Répertoire de travail' (working directory), the 'Zone de transit' (staging area), and the 'Répertoire local (.git)' (local repository). An arrow labeled 'add' points from the working directory to the staging area. The local repository is shown to the right of the staging area. Outside this box, at the top right, is the 'Dépôt serveur (GitHub)' (remote repository).
